

Pär Gustafsson, M.Sc

*Principle Engineer & Manager Structural Dynamics,
Aeroelasticity and Stores Separation*

Pär has a Master of Science degree in mechanical engineering from Lulea University of technology in Sweden with emphasis on applied mechanics. Since 2007, Pär has been employed at Saab Aeronautics, starting as a Loads engineer mainly involved in Wind tunnel testing and stores integration programs. For the last 9 years, Pär has been working as a structural dynamics engineer, and for the last 5 years also with assignments including coordinating the work and being responsible for tools and processes within the technical discipline. Since April 2019 Pär has been assigned the manager of Structural dynamics, Aeroelasticity and Stores separation at Saab Aeronautics.
